DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson et al. (US 5,063,698).

Regarding claims 15-24, Johnson discloses all the claimed invention of an audio leaflet 10, playing an audio message, a memory circuit 22, a lightweight speaker 20, a power source 30, an activating switch 16, an audio playback circuit (figure 3). It is to be understood that Johnson discloses all the structural limitations. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Regarding claims 1-14, the leaflet of Johnson inherently possesses a method for repeated dissemination of audio information in mass by means of an airdrop if required to do so.

*FIG. 2**FIG. 3*

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Golant, Hogue et al., and Pines disclose related art.
